DPPL Sales & Order Tracker — User Guide

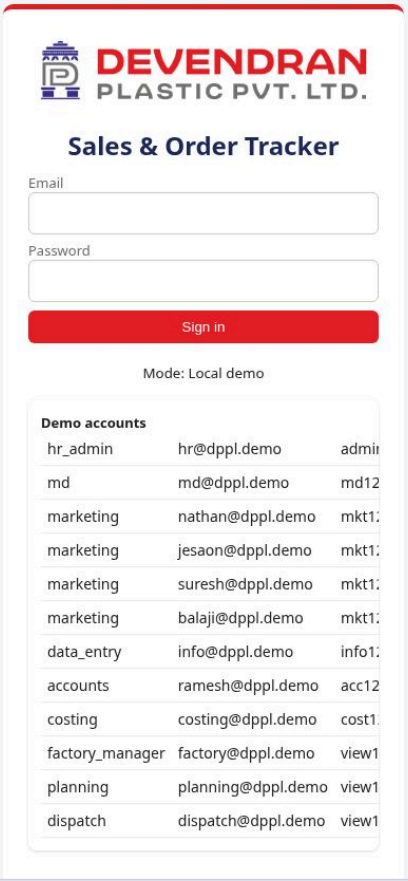

Devendran Plastic Pvt. Ltd. · Flexible packaging · Version 1.0 (November 2026)

Live app: https://devendranplastic.github.io/dppl-sales-tracker/

The app opens in the phone or desktop browser. On a phone, use the browser's **Add to Home screen** option to get the DPPL icon. Amounts are shown in ₹ (Indian format) and dates as DD/MM/YYYY.

---

1. Getting started

1. Open the live link and sign in with your **@devendranplastic.com** email and the default password HR Admin gave you.
2. **The first time you sign in, the app makes you set a new password** (at least 8 characters, with letters and numbers). After that, use the new password.
3. The menu bar shows only the screens your role is allowed to use. The 🔔 **bell** shows messages from the MD or HR Admin.
4. Use **Logout** (top right) on shared computers.

> **Demo mode.** Until the database goes live, the site runs as a local demo in your browser (the header says *Local demo*). Data typed in demo mode stays on that browser only. Demo logins:

> hr@dppl.demo / admin123, md@dppl.demo / md123, nathan@ · jesaon@ · suresh@ · balaji@dppl.demo / mkt123, info@dppl.demo / info123, ramesh@dppl.demo / acc123, costing@dppl.demo / cost123, planning@ · factory@ · dispatch@dppl.demo / view123.

Who's who

Person	Login	Role
HR Admin	hr@devendranplastic.com	HR Admin (super admin)
MD	md@devendranplastic.com	MD
Balaji	balaji@devendranplastic.com	Marketing
Nathan, Jesaon, Suresh	nathan@ / jesaon@ / suresh@devendranplastic.com	Marketing
Office data entry	info@devendranplastic.com	Data entry for Balaji
Ramesh	accounts@devendranplastic.com	Accounts
Costing, Planning, Factory, Dispatch	added by HR Admin in Setup › Users	Department roles

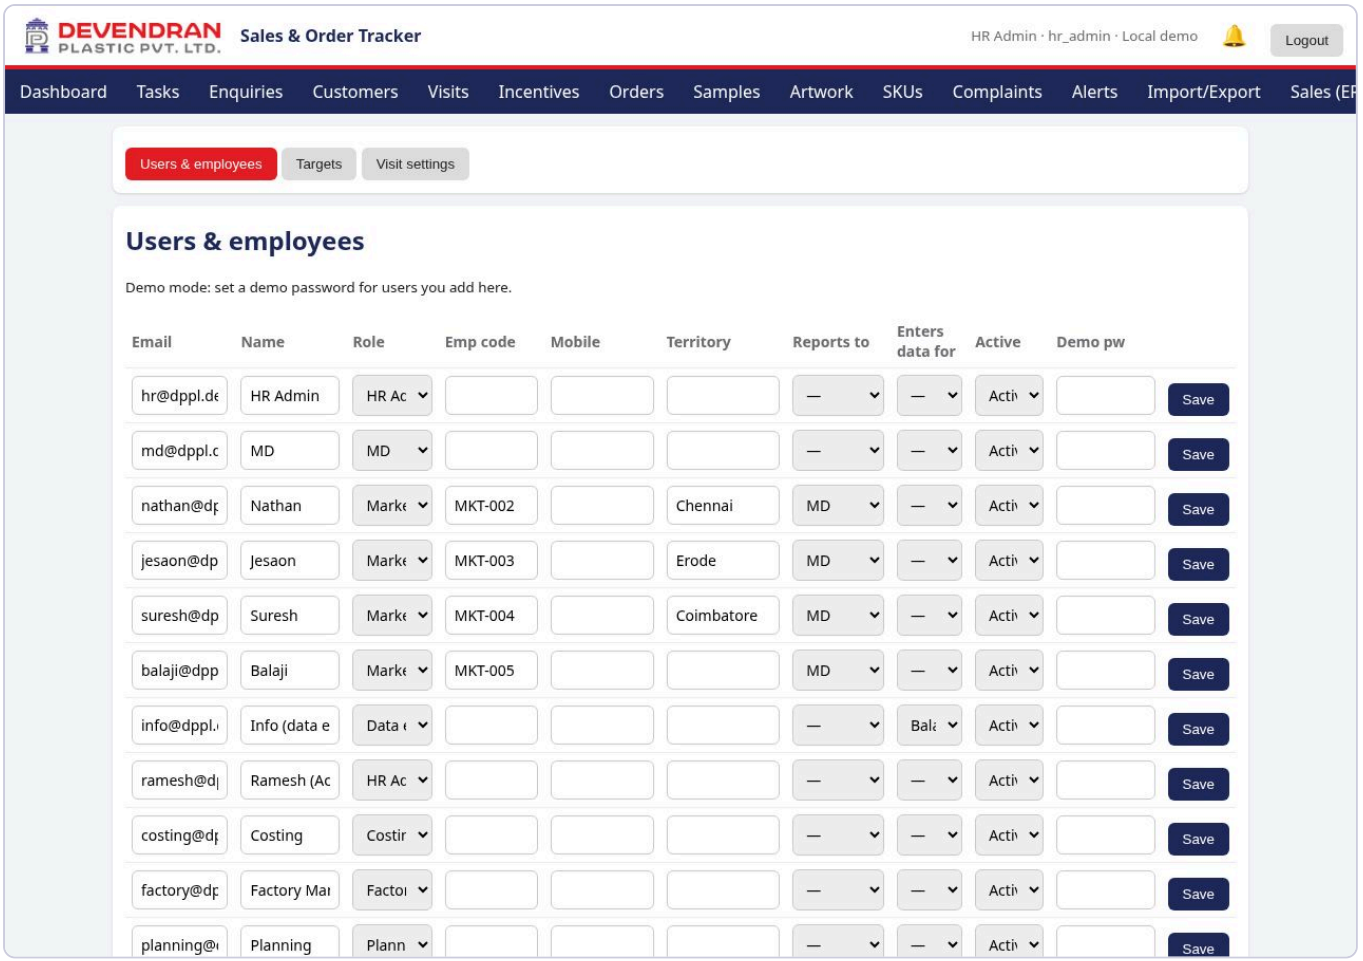

What each role can do

Area	HR Admin	MD / CEO	Marketing	info@ delegate	Accounts	Costing	Planning	Factory	Dispatch
Dashboard and sales-vs-target charts	All	All	Own	—	—	—	—	—	—
Enquiries, visits, follow-ups	All	All	Own	For Balaji	View	View	View	View	View
Costing and margins	Edit	Edit	Hidden	Hidden	Hidden	Edit	Hidden	Hidden	Hidden
Quotations and approval	Approve	Approve	Create	—	—	—	—	—	—
Orders and release	Release	Release	Create	—	Credit approval	—	Stages	Stages	Stages
Dispatch plan	Edit and confirm	View	View	—	View	—	Edit	—	Confirm
Collections, invoices, credit	Edit	View	Own view	—	**Edit**	—	—	—	—
ERP sales upload	Upload	View	Own	—	View all	—	—	—	—
Setup (users, targets)	Edit	View	—	—	—	—	—	—	—
Broadcast messages	Send	Send	Receive	Receive	Receive	Receive	Receive	Receive	Receive

2. HR Admin (hr@)

HR Admin is the super admin. This role controls users, master data and imports.

Setup › Users

- **Add user:** enter email, name, role and reporting manager. New users must change their password at first sign-in. In live mode, use **Invite** (if the invite-user function is deployed) or create the user in Supabase Auth.
- **Enters data for:** used only with the *Data entry* role. Choose the marketing person whose records this user types in. info@ is set to *Balaji*.
- **Deactivate** a user who leaves. Do not delete them: their history stays and they can no longer sign in.

Setup › Targets: add a monthly (or quarterly) sales-value target per marketing person (period YYYY-MM). The MD charts use these targets.

Setup › Visit settings: minimum visits per day, Sunday and holiday rules, and visit purposes.

Import/Export › HR import: load customers, SKU details, previous order history and the **monthly ERP sales CSV**. When you upload the sales file, map each ERP salesman name to a marketing person, or to **Common sales order** for house accounts. The mapping is remembered for later months.

Actual cost: enter the actual cost per kg per SKU each month. Incentives use the latest actual margin.

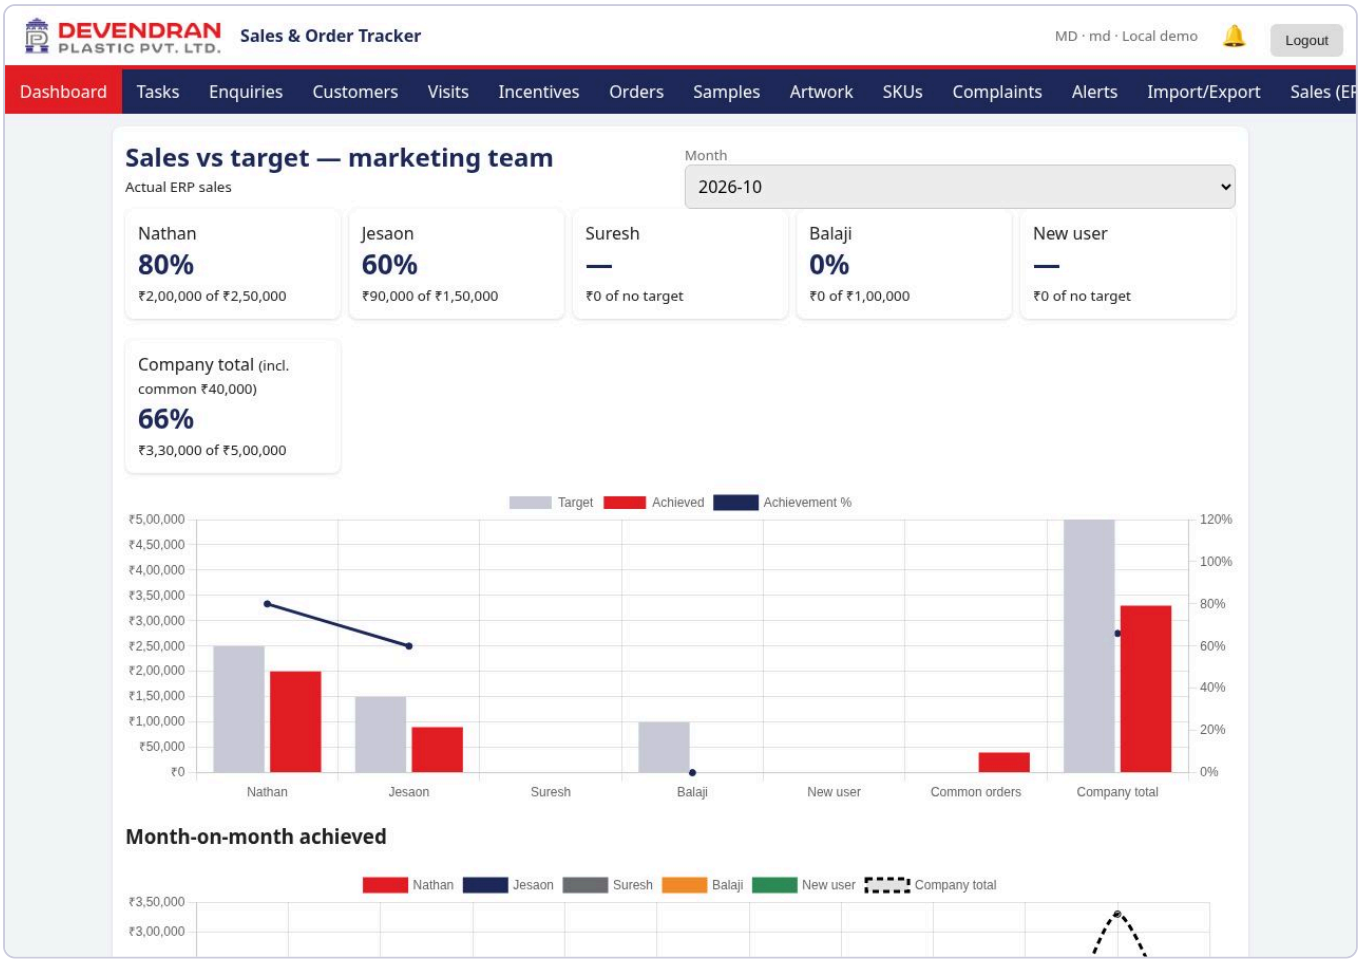

Audit log: shows every change, with the user who made it. A record typed by info@ shows *info@* here even though Balaji owns it.

Messages: use the bell › *New message* to send a notice to everyone or to selected roles.

Monthly routine (first working day): upload the previous month's ERP sales CSV › check the alias mapping › set targets for the new month › enter actual costs › review Incentives › deactivate leavers.

3. MD (md@) and CEO

The MD sees everything, including costing, margins and incentives. The CEO role has the same access and can be given to a user in Setup › Users when needed.

Dashboard — Sales vs target: cards for each marketing person (achieved ÷ target %), plus a **Company total** that includes common sales orders. Use the **Month** selector to look at any month. The bar chart shows target vs achieved, with achievement % as a line.

The **Month-on-month** line chart shows the last 12 months for each person and for the company. *Achieved* means actual ERP sales when that month's CSV has been uploaded. Before that, it uses released orders and won enquiries (the chart caption tells you which).

Other MD tasks:

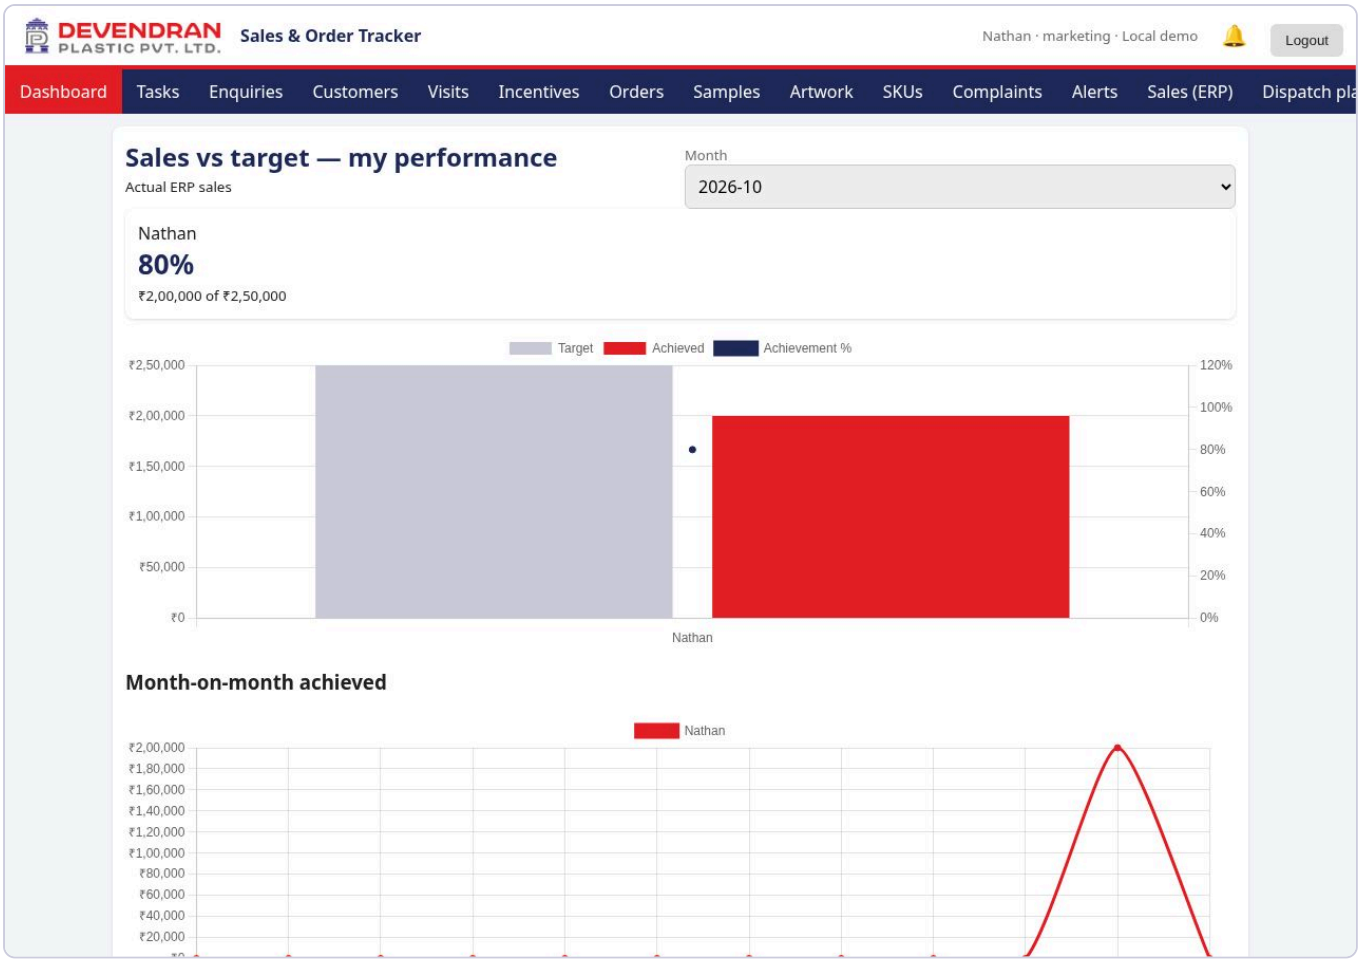

- **Approve quotations** that fall below the minimum margin, or that were sent without a costing sheet (Enquiries › open › *Approve*).
- **Release orders** after the checklist is green (artwork approved, PO, credit OK).
- **Lock artwork** after the customer approves it.
- Review **Alerts** (overdue follow-ups, stuck orders, missed dispatch) and **Collections** (overdue invoices).
- Send **broadcast messages** to the team.

Daily routine: dashboard › Alerts › approvals waiting › today's dispatch plan. **Monthly routine:** check sales vs target for the closed month › Incentives › expense review (when the module is ready).

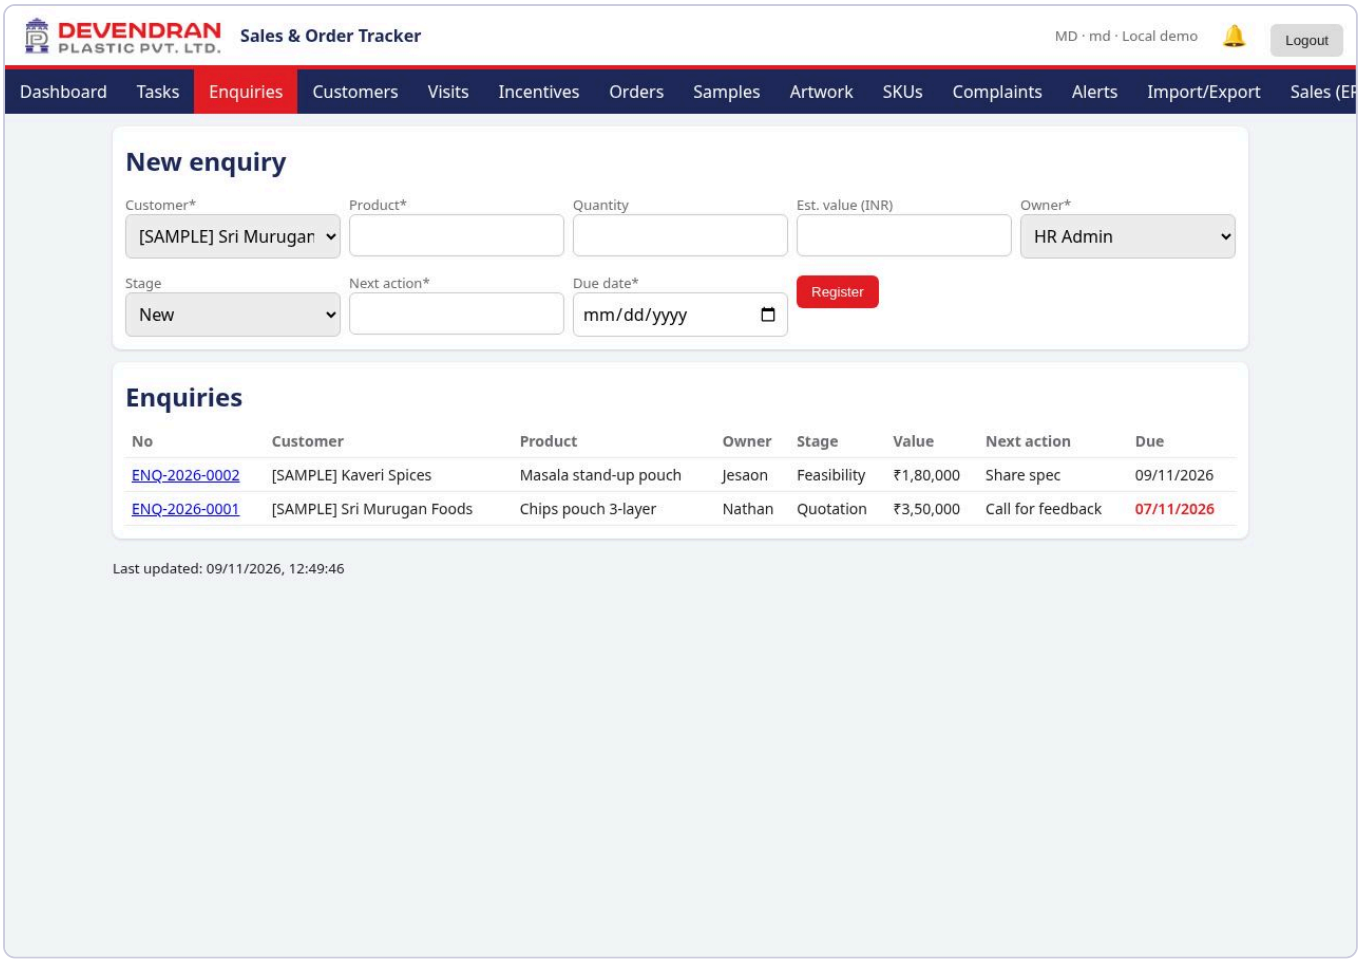

---

4. Marketing (Nathan, Jesaon, Suresh, Balaji)

Each marketing person sees **only their own** customers, enquiries, chart and incentives.

- **Visits:** log every customer visit the same day: customer, new or existing, purpose, discussion, next action. The day's minimum visit count is checked.
- **Enquiries:** create an enquiry (product, size, quantity, due date, next action). The app gives it a number (ENQ-...). Then add the spec, ask Costing for a sheet, and create the **quotation**. A quote below the minimum margin, or without costing, goes to the MD for approval.
- **Tasks:** your follow-ups due today and overdue.
- **Samples / Artwork / Orders:** raise samples, upload artwork for approval, and convert won enquiries into orders with the PO copy.
- **Complaints:** record customer complaints. The factory resolves them.
- **Collections:** view your customers' outstanding invoices so you can follow up on payment.
- **Incentives:** your slab-based incentive on actual ERP sales.

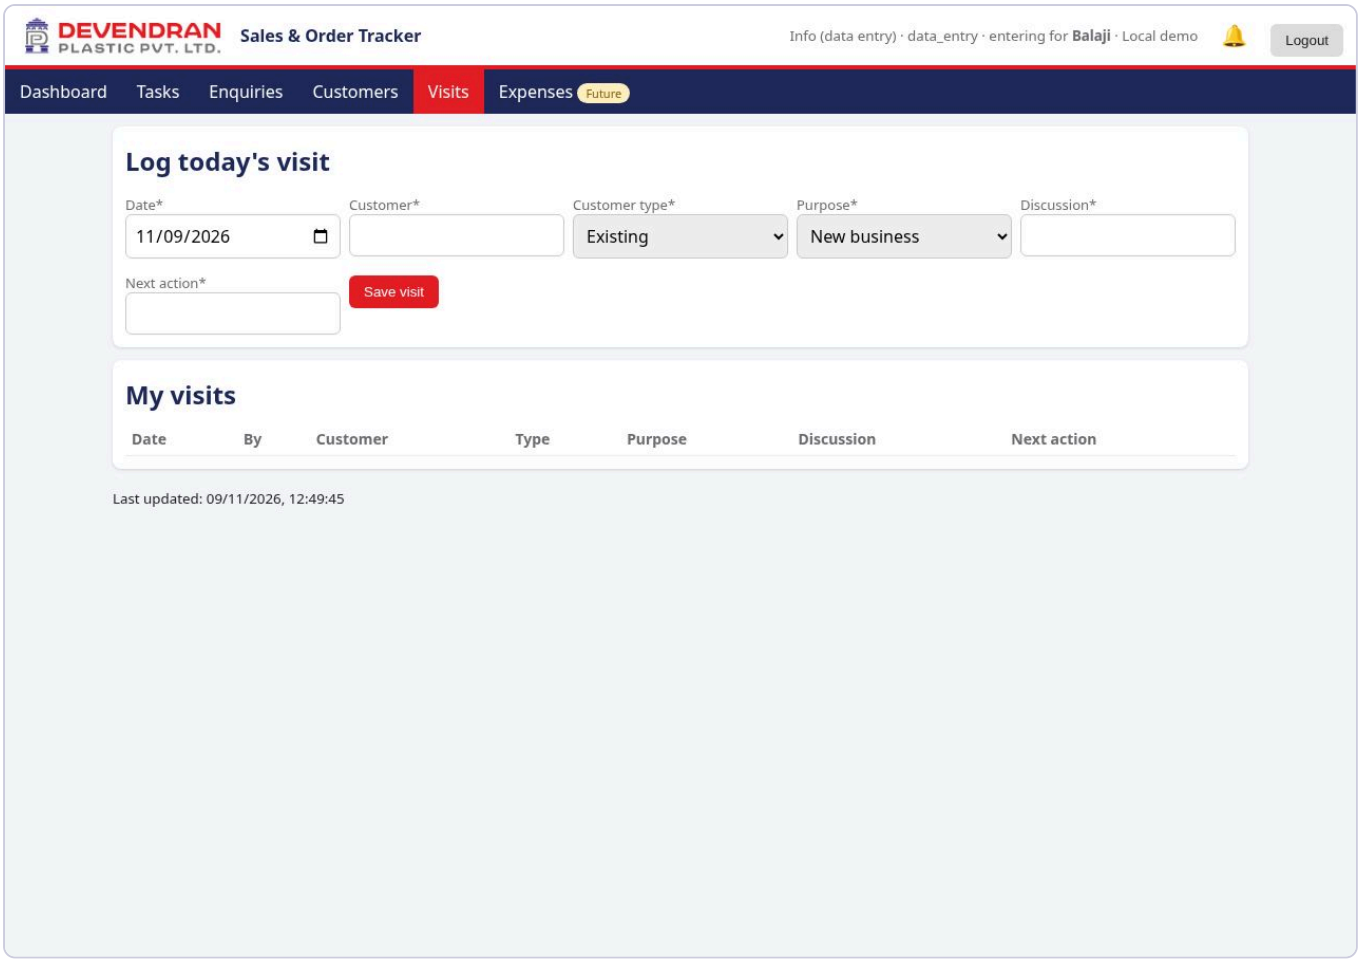

Daily routine: morning: Tasks (due follow-ups) › visits › evening: log the day's visits and update enquiries. **Monthly routine:** check your sales vs target and your incentive after the ERP upload.

---

5. info@ — data entry for Balaji

info@devendranplastic.com enters Balaji's visits, enquiries and follow-ups from the reports he sends.

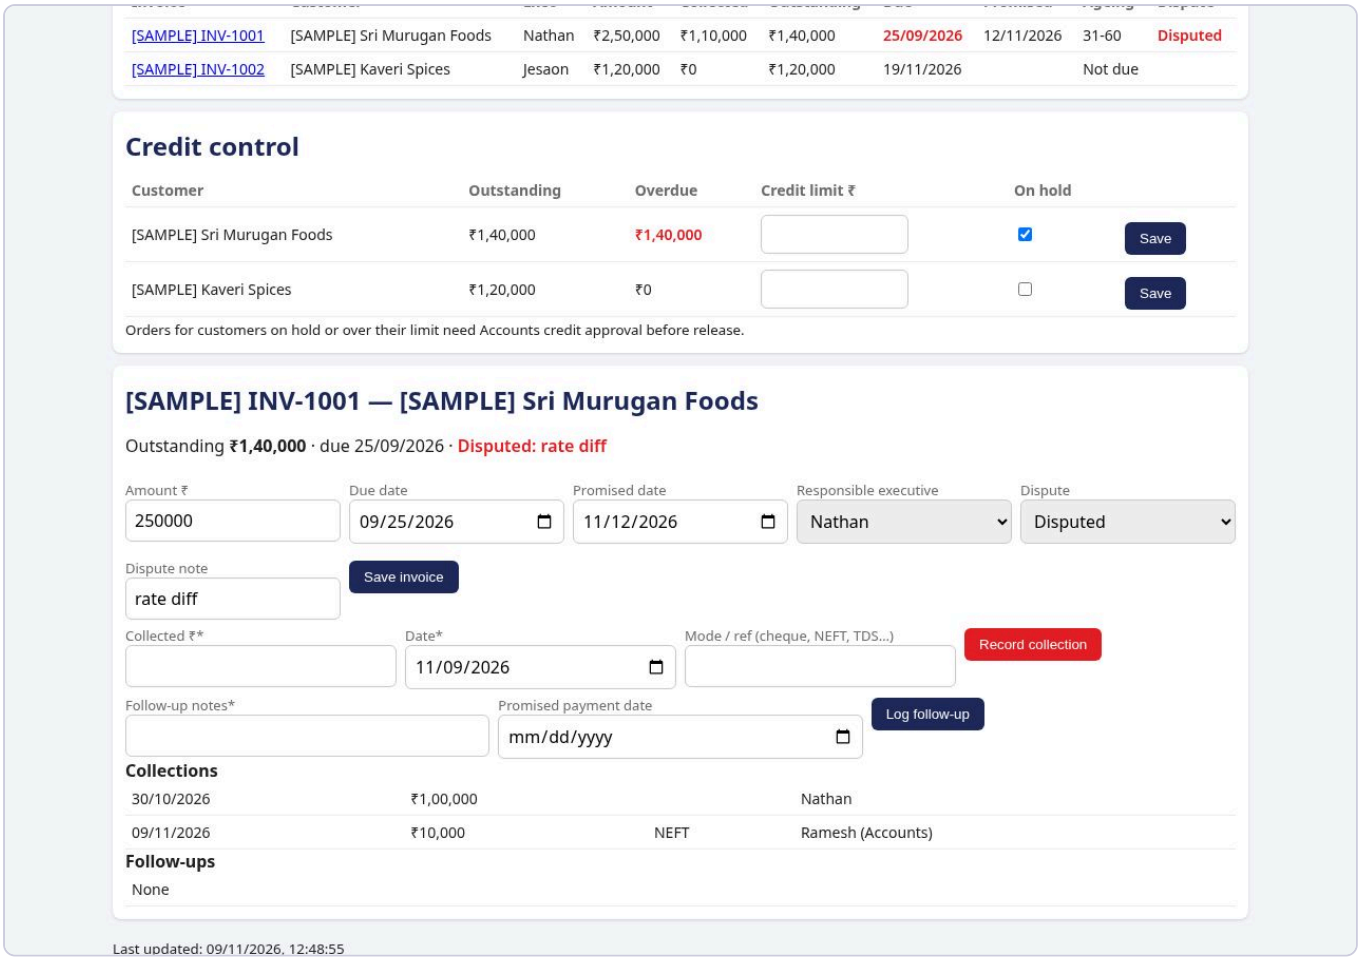

- The header shows **"entering for Balaji"**. Every record you save is **owned by Balaji**: it appears in his lists, chart and incentives.
- The owner drop-down shows only Balaji.
- You cannot see costing, margins or quotations.
- The audit log records **info@** as the person who typed the entry, so HR Admin and the MD can always tell who keyed it.

Daily routine: collect Balaji's visit notes (WhatsApp or call) › enter each visit › create or update enquiries and next-action dates › tell Balaji about anything due tomorrow.

---

6. Accounts — Ramesh (accounts@)

Accounts owns invoice balances and receipts.

- **Collections › Add invoice:** customer, invoice no., amount, due date and executive.
- **Edit invoice:** change the amount, due date or promised date, or mark it **Disputed** with a note.
- **Receipts:** record full or **partial** payments (amount, NEFT or cheque reference). The balance updates.
- **Credit control:** set a **credit limit** and **credit hold** per customer. An order for a customer on hold, or over the limit, cannot be released until Accounts presses **Approve credit** on that order.
- **View only:** ERP sales (all executives), dispatch plan and dispatch invoice copies.
- Costing and margins are hidden. Everything else is read-only.

Daily routine: post yesterday's receipts › update promised dates › check orders waiting for credit approval. **Monthly routine:** review overdue invoices and disputes with the MD › revise credit limits.

---

7. Costing (costing@)

- Open enquiries waiting for costing and fill in the **costing sheet**: material layers, gsm, wastage, conversion and freight. The app calculates cost per kg and margin.
- Enter the **Actual cost** per SKU each month. Incentives use it.
- Only Costing, HR Admin and the MD see margins.

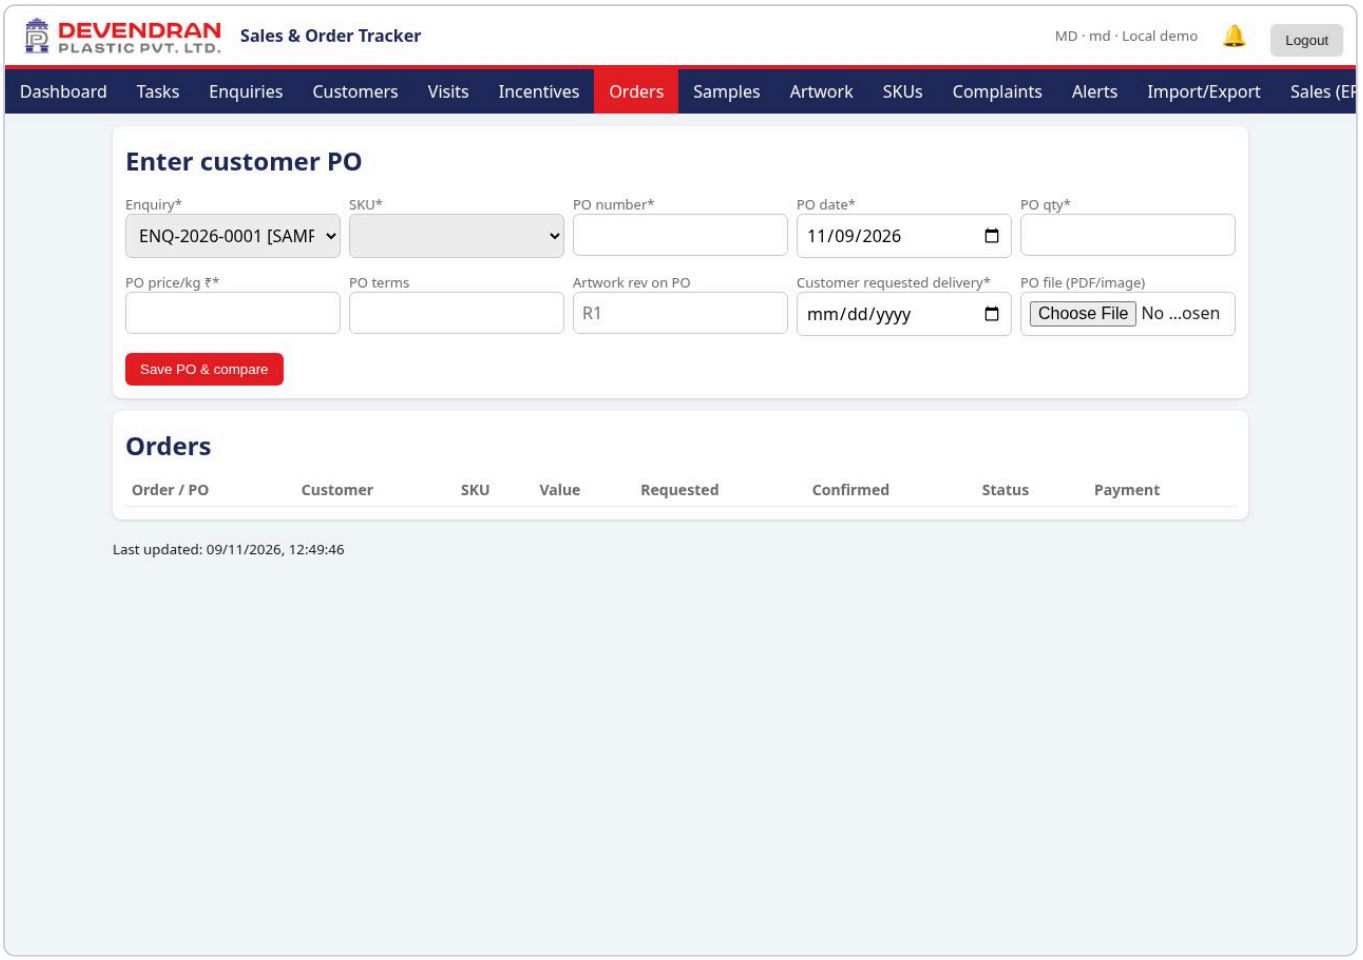

Daily: clear the costing queue. **Monthly:** enter actual costs after closing.

8. Planning (planning@)

- **Dispatch plan:** add tomorrow's plan (order, quantity, date, vehicle).
- Update **order stages** for your department (printing, lamination, slitting, pouching).

Daily (evening): publish the next day's dispatch plan and update stages.

9. Factory (factory@)

- Update order **production stages**, raise **samples** and **resolve complaints** with the root cause and action taken.

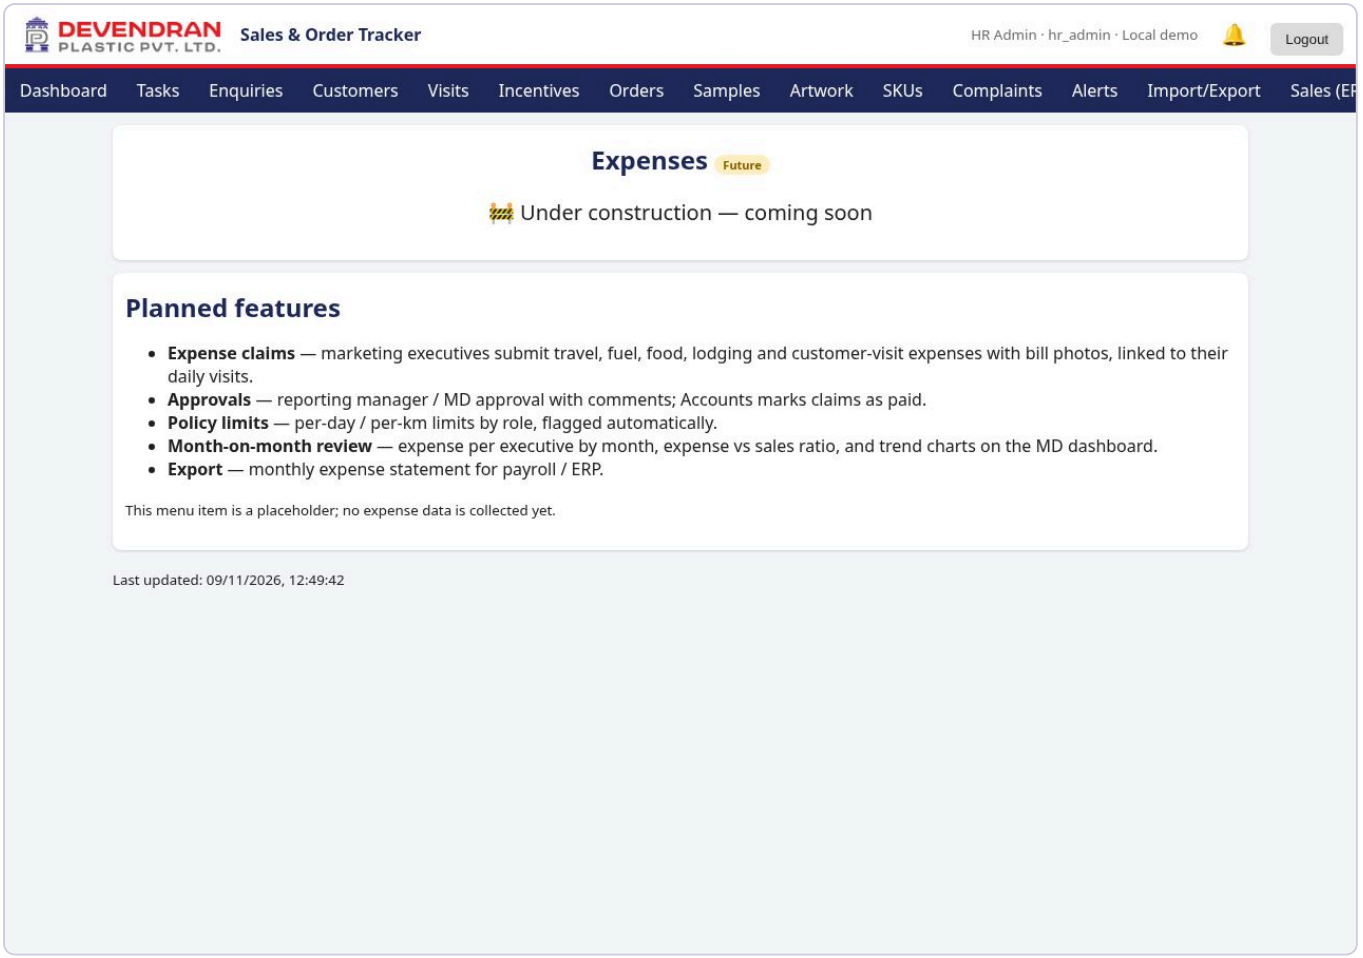

Daily: update the stage of every running order before the shift ends.

10. Dispatch (dispatch@)

- **Dispatch plan › Confirm:** for each planned line, enter the dispatched quantity (full or partial), the **vehicle number** and the invoice no., and upload the invoice copy.
- Lines that are not confirmed by the end of the day show as **Missed** on the MD dashboard.

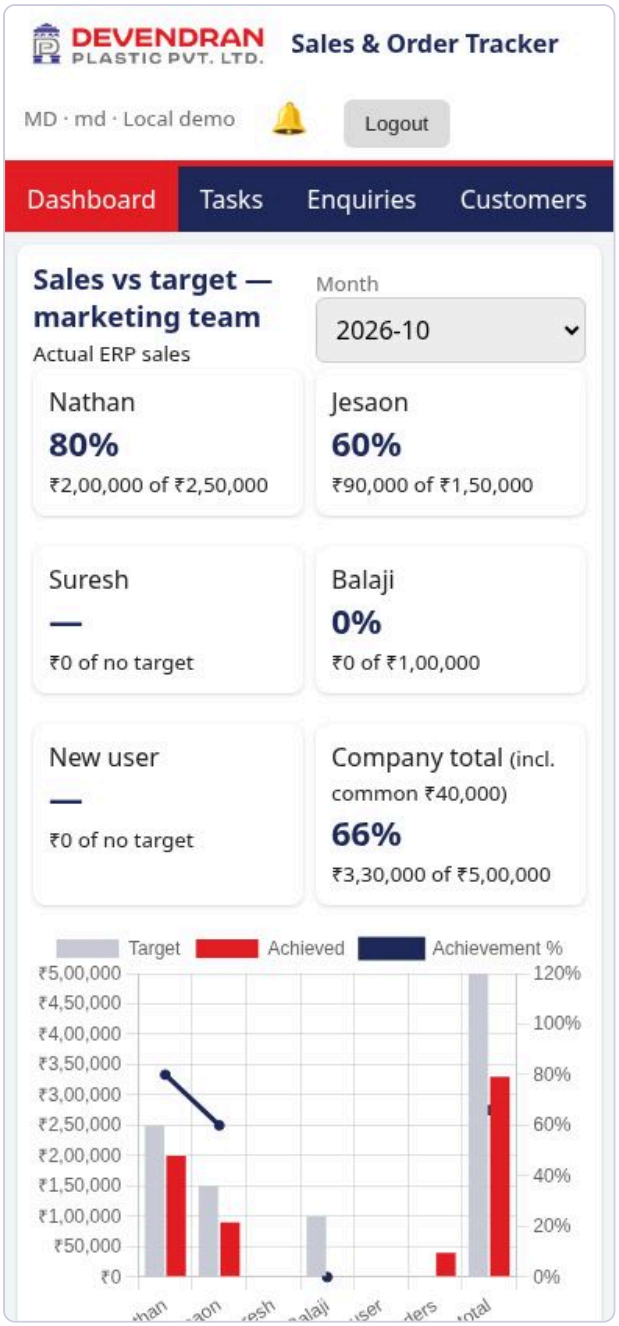

Daily: confirm every dispatch as soon as the vehicle leaves.

11. Expenses (coming soon)

The **Expenses** menu (marked *Future*) is a placeholder. The planned features are expense claims with bill photos, manager and MD approval, policy limits, a **month-on-month expense review** and an export for payroll.

12. Mobile use

The app works on phones: the menu scrolls sideways, cards stack in two columns, and forms in one. Add it to your home screen for one-tap access.

13. Help and safety

- Messages to customers are never sent automatically. The WhatsApp and email buttons only open your own app with the text filled in.
- Forgot your password? Ask HR Admin to reset it in Supabase. You will be asked to change it again at sign-in.
- Problems: contact HR Admin (hr@devendranplastic.com).
